Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is in response to amendment filed on October 15, 2007.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

SPECIES I: Claims 1, 3 – 6,9 and 12 – 22, drawn to a data retrieval system comprising: a retrieval module for retrieving the requested data from the plurality of storage media, the retrieval module comprising a storage and backup map that maps the requested data to at least one of the plurality of computing devices and a data index stored on the at least one of the plurality of computing devices that indicates to the retrieval module a particular location of the requested data on the plurality of storage media, the data index comprising different information than the storage and backup map.

SPECIES II: Claims 23 – 25, drawn to retrieving data in a computer network environment, comprising: a plurality of media modules in communication with the plurality of storage media, each of the plurality of media modules being configured to store and retrieve data from the plurality of storage media, a second computing device configured **to support the operation of at least one software application** and comprising an interface module configured to receive from at least one of the plurality of media modules the data to be retrieved; a plurality of indexes, each of the plurality of indexes being stored on one of the first plurality of computing devices and **being maintained by the respective media module**, and a **storage map stored on the third**

computing device and **maintained by the retrieval manager**, the storage map providing, through the retrieval manager, an indication to the interface module as to which of the plurality of indexes has information regarding the most recent location of the data to be retrieved from the at least one of the plurality of storage media.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
